## CORPORATE CAPABILITIES

### OUR PHILOSOPHY

Founded in 2008, triVariant LLC is a project-management consulting company specializing in Earned Value Management. We help our public- and private-sector clients run their programs more effectively and efficiently. How? By crafting innovative solutions that get the most from their investments through earned value training and implementation, as well as continued support via private consulting engagements.

What does triVariant actually mean? The “tri” represents the three main areas we concentrate on to help our Clients achieve their goals: These are People, Processes, and Tools. But as vital as these three pieces are, it’s the word “variant” that’s the key component of our name, because it stands for how we want to help you — by providing “different or new” solutions to meet your specific needs. We’re not saying that the tried-and-true business methods won’t work, but we believe there’s a better way, and we want to help you address your challenges from a fresh, practical, value-oriented perspective.

We believe that **PEOPLE** are the key ingredient in improving the way you manage and control your projects. Without them, you have nothing. Since people are your most valuable asset, we’ll work with you to establish an environment where there is a strong capacity for change, and continuous learning is part of the culture.

Creating or re-engineering the way you’ll manage and control your projects through pioneering **PROCESSES** will help you maximize efficiency and achieve quality standards. Our innovative strategies will help you develop, improve, or build upon existing solutions to eliminate waste, optimize your employees’ capabilities or outsource functions, and utilize information technology to boost productivity.

As a consulting company, we help you seek out and evaluate the best possible **TOOLS** to support your project management needs — independent of vendor influence or bias. Whether developing a custom software solution, implementing an off-the-shelf product, or enhancing the way your current tools work, at triVariant, we seek the solutions that will yield the highest value for you.

### WHAT SETS triVariant APART?

TriVariant is a high-value, competitively priced, hands-on implementer of Earned Value solutions. We differentiate ourselves from our competitors because we actually implement solutions for our customers and work side-by-side with them to ensure their success. In addition to product knowledge, we have experience integrating the tools, documenting the processes, training staff members, and successfully guiding our customers through tough Earned Value Management System (EVMS) Implementations and EVMS Reviews. Our consultants build long-term partnerships with our clients, ensuring their program needs are continually met as they grow.
